Description

Follow the Vectorworks to hang and circuit the plot.

- Circuit numbers are based on the circuit diagram paperwork.
 - ex. Circuit 42/13 would be circuit 42 on the diagram and outlet 13 on the bar.
- Intelligent fixtures should get HOT POWER from an Edison outlet.
- All high sides should get heat shield in addition to their color.

Equipment

0%

- ☐ 6x ETC Source 4 @ 36 degree
- ☐ 2x ETC Source 4 @ 50 degree
- ☐ 1x ETC Source 4WRD @ 26 degree
